

Environmental Policy

Water Features Australia is committed to minimising our impact on the environment and developing an organisational culture that encourages innovative practices and strives for continuous environmental improvement.

Objectives

In order to achieve this commitment, Water Features Australia will:

- Set and review environmental objectives and targets to manage the environmental impacts and risks associated with our business operations.
- Communicate, consult and engage with our employees, clients, subcontractors, and stakeholders on environmental matters to improve compliance and performance.
- Develop an ethos of environmental responsibility in all of our employees and subcontractors, and work together to achieve agreed environmental outcomes.
- Conserve water resources and minimise wastewater disposal.
- Prevent pollution, reduce waste and consumption of resources such as materials, fuel and energy, and commit to reuse and recycling as opposed to disposal wherever feasible.
- Continue to identify and investigate viable options for energy reduction, and implement these options wherever feasible.
- Aim to utilise environmentally friendly chemical alternatives whenever possible.
- Use suppliers with sound environmentally sustainable practices wherever possible.
- Comply with all applicable environmental laws, regulations, policies and standards, and take any such additional environmental protection measures as we consider necessary.
- Maintain, monitor, review, audit and continually improve our Environmental Management System and practices to meet our business needs and the requirements of AS/NZS ISO 14001.
